installing a camera at the beginning of 10th. this street gets the most outside activity due to the opening at the end

So happy to see that this is a conversation. we support the current off duty Police initiative however most often due to lack of funds They are not on duty and cannot be in more than one place. Therefore, I'm definitely for closing off entrances additional hours of patrol. I don't think, unmanned gates are a big deterrent. All for initiatives that will prevent the crime, car theft and overall feeling of peace. Thanks

Change hours of patrol to overnight hours when most cars are stolen.

if people were smart enough to lock their car doors, crime would decrease 10 fold.

As someone who has had their car attempted to be stolen twice in the last month, with one event classified as a home invasion, I want to commend the off duty police and the relationship RVCA has setup with them. Within seconds of texting/calling they responded, and they constantly followed up for a month. I do not think closing off access and funneling traffic down less streets is the solution, technology and more surveillance is. I'm happy to pay towards this and I know many others are as well.

I'm no expert on the crimes here, but we have heard about the thefts, of cars or the contents of a car (and boats). I am not aware of home break-ins (yet) or crimes against individuals. The sources of the crime; possibly a mix of professional thieves and amatuers (kids on bikes?). Preventing un-authorized access to our neighborhood sounds great but may be hard to manage given our world of food and product delivery, plus water access. We need to actually catch some of the perps and prosecute, which may get the word out that we are serious.

More stop signs - specifically at Cordova and 12th by LYC

I support security, but I do not want a HOA. People chatter, but we're reasonably safe here. It would be nice to control a lot of the "cut through" traffic, but unmanned gates are a troublesome solution. Maybe more speed bumps?

Because we have such a large community, I don't feel qualified to offer other ideas as have no way of knowing what a large community like ours could do without major agreements. Thanks for the Board's work!

More speed bumps, limit hours further for service providers (landscapers, pool cleaners, construction companies) to reduced non-resident traffic in evenings and on weekends

No.

Adding Cameras around the neighborhood.
And Making our neighborhood a gated community.

license plate readers and gates on the bridge of each isle in rio vista

Have overnight police. Theft isn't happening so much during the day. We need people patrolling overnight.

With the amount of constant construction and the number of lawn services that work in this neighborhood, closing off the community is likely impossible. The entrance on Federal and 7th is already dangerous- with trucks and cars parked next to Primo the lanes are often already blocked , cars come out of that parking lot without heed for crossing traffic, and with the fast-moving traffic on Federal, it is impossible to stop, without the risk of being hit from behind. So, while I favor a gatehouse, some solution must be found for the blockage issue first. Deliveries either need to be timed differently and or be required to go into the back lot

Slow everyone down with more speed bumps. Post security at the major neighborhood intersections.

add the gates and close off N Rio Vista except to exit. no entrance.

I think it is time to either make our neighborhood a gated community with unmanned or manned security. The theft and crime is unbelievable and unsafe for everyone living here. There are way to many entrances. The is no reason why we can't close off the streets. Tried of the excuses.

I need more information prior to answering a blanket yes/no to several of the questions.

There is a well-known vehicle theft/crime problem that the police are ignoring. We shouldn't have to pay extra to have our neighborhood security by the tax-funded police.

New to Rio Vista but support security measures.

Get abriu park back

enforce the traffic laws

Cameras, community awareness and police presence are excellent tools
